- **Relevant Coursework:** Data Structures, Algorithms, Object-Oriented Programming, User Interfaces, System Design, Embedded Systems, Computer Organization, Operating Systems

Experience

Gap Inc.

London, ON

IT Support Technician

June 2025 - Present

- Delivered end-to-end IT support at Gap Inc.'s Distribution Centre, resolving hardware, software, and access issues using [ServiceNow](#), [Jira](#), and [Nextthink](#), while supporting identity, device, and endpoint management with tools such as [Active Directory](#) and [SCCM](#), ensuring reliable daily operations and minimized downtime.
- Implemented and maintained enhancements to a company-wide internal web portal used across all Gap Inc. Distribution Centres, using [Astro](#), [HTML/CSS](#), [Tailwind CSS](#), [JavaScript](#), [JSON](#), and [MySQL](#), with changes [version-controlled and deployed via Git](#).
- Supported [Zebra TC52 handheld devices](#), [printers](#), and [Windows-based systems](#) using [AirWatch](#) to manage devices and minimize downtime in a [high-volume warehouse environment](#)

Banana Republic

Vaughan, ON

Acting Lead and Daily Operations Manager

May 2024 - June 2025

- Analyzed operational data and automated performance reporting using [Excel](#) and [Microsoft Power BI](#) while overseeing and supporting a team of **40+** employees to meet business and revenue targets.

BuyWise Plus

Toronto, ON

IT Technical Support and Software Engineer

Jan 2023 - Apr 2024

- Built an internal [employee and device tracking web tool](#) using [React](#), [TypeScript](#), [JavaScript](#), and [HTML/CSS](#), reducing manual tracking effort by **30%** and improving visibility for **20+ employees**.
- Managed [user provisioning and access control](#) for **50+ employees** via [Microsoft 365 Admin Center](#).
- Used [Git](#) to version internal tools and authored standardized [technical documentation](#), reducing repeat support issues by **25%** and improving team efficiency.

Projects

Covid (Best Hardware Hack at yuHacks 2021)

[Github](#)

- Developed a [mobile application](#) that allowed businesses to scan cov-IDs (NFC cards) to quickly and securely verify customers' COVID-19 test results before entry, ensuring safer access.
- **Technologies:** Java, XML, Android Studio, NFC (secure validation), Google Maps API (real-time location tracking).

Portfolio Website

[Github](#)

- Designed and developed a responsive personal portfolio to showcase [projects](#), [skills](#), and [experience](#), featuring a clean [UI](#), dynamic content rendering, and modern front-end best practices.
- **Technologies:** React, TypeScript, JavaScript, Tailwind CSS, JSON.

Leadership

YorkU CSHub

Toronto, ON
